DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 2-10 are rejected under 35 U.S.C. 103(a) as being obvious over US Patent 5160869 to Nakahata et al. (Hereinafter, Nakahata)

Nakahata discloses a surface acoustic wave (SAW) device comprising a ZnO layer stacked on a dielectric thin film comprising a diamond layer and interdigital transducers disposed on the ZnO layer.

Nakahata also teaches, that in order to achieve a large electromechanical coupling factor one have to define the thickness of the ZnO layer and the mode.

However, Nakahata fails to disclose the use of a second order mode and the values of $2\pi H/\lambda_M = 5.0$ to 10.0 .

It would have been obvious to one having ordinary skill in the art at the time of the invention was made to define the second order mode and the value of $2\pi H/\lambda_M$, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. In re Boesch, 617 F.2d 272, 205 USPQ 215 (CCPA 1980). Based on the same teachings, the applicants are defining other values for the expression $2\pi H/\lambda_M$.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
